

# Lego®-based Therapy Training

Lego®-based therapy is a structured group intervention designed to help children learn and develop social competence through the developments of social skills.

Collaborative Play provides opportunities for children to practice skills of turn-taking, listening, sharing ideas, communication, compromise, problem-solving and shared attention.

Participants will feel confident to plan and run a group with materials provided after the training.

Facilitated by an experienced Child Therapist/Clinical Social Worker.

Suitable for Play Therapists, teachers, teaching assistants, SENCO's, social workers, supervising social workers, after school providers, family support workers, students, early help and youth workers.

Resources included on USB.
